

Business Summary

Atlantic Pipe Services was incorporated in Sanford, FL with a goal of being the state's **premier trenchless technology provider**. At our inception, we were able to achieve that goal out of our office in Sanford. As our client-base grew, so did the geographic footprint of our job sites. It became increasingly evident that if we were going to maintain our premier service, we would need to expand our network of offices. APS opened an office in Bunnell, FL to service Northeast Florida; then West Palm Beach to service Southeast Florida; and most recently we opened our Tampa, FL office to service the Gulf Coast. The three additional offices we added combined with our corporate headquarters in Sanford, FL have allowed us to achieve the growth we desire and maintain an unparalleled service and product for our clients.

As our network of offices grew, so did our need for employees. With the evolution of our company, we have now grown our work force to nearly 100 employees throughout the State of Florida. Our Team is what makes everything possible at APS. Our work force is our most valuable asset.

A growing footprint and a growing client base necessitated a larger and more diverse fleet of equipment. Throughout Florida we now operate and maintain a fleet of over 60 different vehicles. Our fleet of VAC Trucks, TV trucks, Grout Trucks, Boiler Trucks, Reefer Trucks, Dive Trucks, Support Vehicles, and Trailers are all newer year models and meticulously maintained. Balancing our growth goals and our mission to offer a premier service to our clientele is a delicate balance and one that we monitor daily. Ultimately, our expanded footprint, our large and growing work force, and our diverse and vast fleet of equipment allow us to grow and serve an expanding client base; **without sacrificing our mission to offer a premier service and product to our clients.**

APS' management team has completed over \$50 million in trenchless repair and rehabilitation/inspection services. That experience derives from both governmental and private sector projects. There is no job too big or too small for the team at APS. Our private sector projects average \$20,000.00 and our Team has completed large scale government contracts in excess of \$5 million. Our relationship with Argo Surety allows us to bond projects in excess of \$10 million.
